REPORT OF FIELD INSPECTION

Date: May 5, 1977 *Sec 31, 40S, 7W*
Mineral Lease No.: 19890, 26654, 27966, 30089, 26755 (Gemstone)
Lessee: Gerald W. Berry dba "Tetla"

Sec 36, 40S, 8W

*File - 'Tetla'
Gerald W. Berry
Gemstone Mine
Kane Co.*

PURPOSE OF VISIT: *Sec 2, 41S, 8W*

To look over leased lands and associated mining activity and to recommend some reclamation procedures.

COMMENTS:

After inspecting the leased lands with the lessee it was agreed that the reclamation work should parallel that of previously reclaimed land in the same vicinity; that is, the area would be cleaned up, disturbed slopes would be graded to result in smooth slopes and benches which would be reseeded with appropriate species including yellow sweet clover. It was also agreed that lessee would experiment with reseeded on disturbed areas to see what other types of plants would do well. The lessee will be required to post a \$1,000 bond for each lease being worked.

FOLLOWUP:

Write and inquire if bond has been secured. Also remind lessee to pay appropriate royalties.
